

# lw-transaction-timeout

Use this parameter to specify the number of seconds after which a new transaction will be auto-aborted by the system. If omitted or 0, the system default auto-abort timeout is used. This parameter is only effective when used with request that creates a new TMF Transaction.

```
POST http://lightwave.example.com/lightwave/api/v1/transaction HTTP/1.1
lw-transaction-timeout: 30
```

```
HTTP/1.1 200 OK
Content-Type: application/json
lw-transaction-id: 2c00031c9bb70000380b806a992f7c6e
lw-transaction-state: suspended
```
